

# Core flow, end to end — onboarding to shelf.

## ASSUMPTIONS

Working from your two research docs (architecture + auth/onboarding spec). One committed direction: the doc's editorial-clinical hybrid — display serif + clean grotesque, warm clinical neutrals, one restrained clay accent. Light mode first, with the night-routine and capture screens shown dark since that's when they're used. Quiz uses original 4-axis questions (no BSTI items). No trial toggle on the paywall (Apple 3.1.2).

## DESIGN DECISIONS

Type: Instrument Serif for editorial moments, Hanken Grotesk for UI. Privacy copy is treated as brand voice, not legal fine print — it appears at every sensitive moment. Streaks and cycling are calm, not gamified. Conflict rules always carry an evidence grade and a non-alarmist resolution, per the doc's caveat that the evidence is contested.

paper · greige · clay · ink · night

## 01 Onboarding — quiz first, account later

anonymous session → consent → quiz →  
reveal → paywall

# Healthier skin in eight weeks, built around *your* skin.

A routine that fits what's already on your shelf  
— and photos that never leave your phone.

Begin

I already have an account

• No ads • no data sales • photos stay on device

01 • Welcome — anonymous session starts silently here

## What brings you here?

Choose up to two — this shapes your plan.

Clear skin

Breakouts &  
congestion

Even tone

Dark spots & texture

Barrier repair

Redness & reactivity

Hydration

Tightness & dullness

Fine lines

Firmness & elasticity

Sensitivity

Stinging & flushing

Continue

02 · Goals — large tappable cards, multi-select

## Before the quiz — your privacy.

Your answers describe your skin's health, so we ask plainly. This consent covers **collection only** — we will ask separately before anything is ever shared.

**WHAT** Quiz answers, skin goals, and products you add.

**WHY** Only to build and adjust your routine.

**NEVER** Sold, shared, or used to train AI.  
Withdraw anytime in Settings.

OIL & MOISTURE

By mid-afternoon, how does  
your skin usually feel?

**Tight, sometimes flaky**

Like it needs another layer

**Comfortable**

I don't think about it

**Shiny in the T-zone**

Forehead and nose, mostly

**Oily all over**

Blotting paper is a friend

**Next**

YOUR SKIN PROFILE

Dry, sensitive,  
*quietly resilient.*

Your barrier wants gentleness: a low-strength retinoid two nights a week, no daily acids, ceramides every day.

Not now

# Your plan is ready, Maya.

Built for dry, sensitive skin — two goals, four products.

- Routine intelligence — order, timing, skin cycling
- Ingredient conflict checks, with evidence grades
- Private photo timeline — on-device only
- Reminders, streaks & home-screen widgets

Moderate

Evidence: contested

## Retinol × glycolic acid

Used the same evening, these can compound irritation — especially on sensitive skin like yours. Recent research suggests the risk is smaller than once thought, so this is a *recommendation*, not a rule.

### OUR SUGGESTION

**Alternate nights — retinol on cycling nights 2, glycolic on night 1. Already reflected in your plan.**

Affected products

Retinol 0.3% · Glycolic 7%

Source

Derm. literature review, 2025

**Keep alternate nights**

Use together anyway

## NEXT STEPS

① Pick what's working — I can push variations on any single screen (e.g. 3 takes on the reveal moment, or a warmer vs. cooler palette). ② Make the flow clickable as an interactive prototype. ③ Real photography will change the capture/compare screens most — placeholders are marked. ④ Widgets + Live Activity ("tonight's step") are natural next screens.
